

Airl encourages me to participate in my community by encouraging good moral and family values.

Airl encourages me to be a better individual. Better individuals create better communities.

If Airl is displaced there will be a void in an entire genre of music (Christian Alternative) which is uplifting. Other genres can be uplifting, but many people like me are primarily encouraged by this type of music.

Better Christians make better citizens. In this post 9/11 world we need to encourage people to be better citizens. We need people who are informed and care enough to do something with the information. Airl encourages such things. Airl's news is informative and many of the people who listen care enough to do something with the information. There will be a void of this type of encouragement if Airl is displaced.
